PeopleNet CRUDE OIL WORKFLOW

Fast. Smooth. Efficient. Virtually free of aggravation. Yes, we're talking paperwork. With Crude Oil Workflow from PeopleNet, you streamline your paperwork, and boost the efficiency of your hauling operation. You get pickups and deliveries done faster and more accurately. And you end up with happier customers—and drivers—in the process.

On time, on track, on the money

Designed specifically for the crude oil hauling industry, Crude Oil Workflow automates time-consuming paperwork and integrates information in real time throughout your operation. No waiting for drivers to return paper tickets so they can be entered in your back office system. No delays creating and sending invoices. No problems sharing information with customers. Plus in-cab calculations and ticket printing speed up paperwork and take chance out of the equation—from bad weather to bad handwriting. And because Crude Oil Workflow is tied to your dispatch system, drivers don't have to keep calling the office for load updates. In short, you run more efficiently, enhance customer relationships and save on your bottom line. Every pickup, every delivery, every driver, every time.

Crude Oil Workflow lets you print tickets on the spot, and share information in real time.

PeopleNet is part of Trimble's international Transportation and Logistics division.

Robust capabilities for rough conditions

Crude Oil Workflow was made for the tough, ever-changing world where you operate. From store-and-forward functionality to keep reporting and billing on track when a truck's signal is offline, to tickets that withstand a sudden downpour, it makes you more efficient no matter what the day's work throws at you.

Customize for your business. Basic workflow design can be configured to fit your requirements.

Add the modules you want. Build out your workflow system with an à la carte menu of modules.

No signal, no problem. Holds information in the system and instantly forwards to the office when the signal is restored.

Print on the spot. Document pickups, deliveries, training and more—quickly, professionally and accurately. And customize the tickets you print with your company's logo.

Calculate barrels automatically. No need for drivers to figure it out in the field.

Split tanks. Pull oil from multiple tanks at a single location without new paperwork—even if the original dispatch is for a single tank.

Train in cab, in minutes. Drivers learn the system quickly and easily, on actual screens, in their trucks.

Capture signatures. Use your TABLET to capture signatures for tickets, print and send to your back office.

Integrate with existing software. No need to change—Crude Oil Workflow works with systems you already have in place.

Stay in touch by satellite. Keep communications online in remote areas with satellite upgrade.

The Crude Oil Workflow interface is simple, intuitive and easy for drivers to learn.
