

Know. Then go.

Now, nothing is off-grid. Not when you have Oil and Gas Field Mapping* from PeopleNet Energy Services—the only off-road mapping service in the United States and Canada. It gives you web-based, turn-by-turn access to more than a million privately leased roads, facilities and well sites. And it's just part of a powerful platform with an entire lineup of robust applications designed to make you faster, safer and more compliant. So you can go *find* energy, not waste it.

Web-based oil and gas field mapping.

Leave your competition in the dust with the only web-based mapping service packed with critical off-road details on over one million lease roads, facilities and well sites. Why drive blindly? Give your drivers the foresight to know where they're headed and watch your operation access new levels of efficiency.

Industry-critical insight, technology and support. Right now.

From asset tracking to navigation to safety and compliance, PeopleNet Energy Services give you the detailed insight and real-time information you and your drivers require to meet—and beat—the rigors of the field.

In-cab Navigation.**

Cut out-of-route miles and costs with navigation based on the most detailed off-road data in the industry, updated regularly for oil and gas specific navigation challenges such as private lease roads, well, facility and survey locations. In-cab navigation helps drivers and crews get to those off-road locations the first time—every time.

Real-time, reliable communication and coverage.

Near. Far. And in-between. PeopleNet offers expansive service coverage with nearly 100% uptime—plus optional satellite support, so you can be sure your message will go through, even in remote field locations. And with in-cab messaging, real-time communication between driver and dispatch keeps your vehicles on route with up-to-the-second updates and information.

Safety on the road and in the field.

- **PERF button**—Rest assured that all radio frequency (RF) devices are turned off at sensitive perforation sites. With the single push of a button, drivers can shut off all RF systems in their trucks to prevent potential accidents, while not losing data.
- **Out of Truck Notification**—Keep service technicians safe with this time-sensitive alert feature that sends an urgent message to the office should a driver not return to the truck within the time allotted.
- **Crude Oil Workflow**—Optimizes the pick-up and delivery process for the crude industry's specific hauling requirements. Crude Oil Workflow provides in-cab calculations to enable accurate reporting to the back office system, and delivers in-cab printing of standard and customizable run tickets for a smooth, efficient experience.

** In-cab Navigation powered by CoPilot Truck Energy.

Robust PeopleNet Applications for compliance and ease.

- **eDriver Logs®**—Automate hours of service (HOS) while reducing violations and improving driver efficiency and safety. With eDriver Logs, you and your drivers get real-time access to the information you need to manage HOS risk and exposure—without the paperwork.
- **Automated Fuel Tax**—Take out the tax reporting headaches. Automated Fuel Tax combines GPS tracking and fuel purchase information so you no longer have to manually log miles, track routes and record fuel purchases.
- **Speed Monitoring**—Identify high-risk behaviors and habitual speeders by pinpointing event times and locations.

Detailed reporting on drivers and assets.

No question about how your fleet is performing. The Executive Dashboard provides at-a-glance visibility to your operations metrics and seasonal trends.

Idle and Operation Time

Measure trends through Driver and Asset Scorecards.

Know more about your operation with PeopleNet. More about driver behavior, from safety and speeding to when and where infractions happen, all with Driver and Asset Scorecards. At a glance, measure and identify trends so you can make decisions ahead of the curve.
