

# In-Cab Scanning

*Faster billing cycles leads to greater ROI.*

Now there's an easy way to eliminate inefficiencies that can impact the bottom line. Thanks to In-Cab Scanning powered by TripPak SCANNING™, your fleet can have a fully integrated solution to increase billing and payroll efficiency and reduce out-of-route miles. Replacing manual forms with high quality scanned images on the PeopleNet System not only improves data integrity but also eliminates manual sorting and filing of bills of lading, delivery and receipts. It all adds up to faster billing cycles since carriers can show proof of delivery instantly—and increased revenue, improved customer service and greater ROI.

**Availability:** PeopleNet **TABLET**™, PeopleNet **BLU**® In-Cab PC

#### **In-Cab Scanning helps fleets:**

- Reduce out-of-route miles
- Show proof of delivery instantly
- Speed up billing cycles
- Improve customer service
- Improve the bottom line
- Improve driver satisfaction

# PEOPLENET AND TRIPPAK SCANNING™: A WIN-WIN SOLUTION FOR DRIVERS AND CARRIERS.

The TripPak scanning device connects to the PeopleNet System via USB port, delivering driver convenience and a better bottom line for carriers. To scan inside the cab, simply place the paperwork in the feed tray. The scanner automatically scans, encodes and submits the document to the PeopleNet System for driver access.

The Automated Workflow trip integration feature on the PeopleNet System allows drivers to immediately associate scanned images to specific stops along trips. And TripPak SCANNING integrates the indexed images with back-office systems for automated data management, billing and driver payroll processing.

## Watch your cash flow improve—almost immediately.

In-Cab Scanning reduces billing cycles, speeds up your cash flow and improves your bottom line by eliminating the extra time it takes for drivers to hand or mail in documents for invoicing. Time from delivery confirmation to customer invoicing to payment receipt is reduced from weeks to days. And the integrity of data is improved since manual forms entry is replaced by high-quality scanned images.

## A complete and fully integrated solution.

The In-Cab Scanning hardware consists of a portable scanning device (TripPak SCANNING 467) and the In-Cab Scanning software.
