

Speed Monitoring

Keeping your driver's speed in check.

Speed Monitoring in partnership with SpeedGauge® is more than a way to monitor your drivers' speed. Our customers have discovered that, in most cases, it can reduce speeding by as much as 50 percent. Speed Monitoring also helps fleets identify high-risk drivers and habitual speeders by pinpointing times and locations to promote coaching opportunities for management.

Availability: PeopleNet **TABLET**,™ PeopleNet **BLU**® In-Cab PC, PeopleNet **Driver Terminal**

- Reduces excessive speeding
- Identifies high-risk drivers
- Reports incidents
- Generates group and fleet summaries

SAY HELLO TO HIGHER PERFORMANCE— AND A MORE PRODUCTIVE FLEET.

Increase fuel efficiency. Increase fleet longevity. Improve your bottom line.

Keeping your fleet's speed in check doesn't mean you have to slow down delivery. You can actually create a more productive, safe and reliable fleet. According to the Department of Transportation, excessive speed is a major factor in 39 percent of avoidable accidents and a leading indicator of other types of poor driver behavior. Speed-related crashes result in nearly 1600 deaths in the U.S. each year, as well as \$6 billion in lost productivity. Speed also contributes to poor fuel economy and vehicle maintenance costs. But now SpeedGauge® solutions can help fleet operators identify high-risk driving behavior, control speed and monitor, rank and rate drivers—on all types of roads, nationwide.

How SpeedGauge works.

Using the onboard computer, location data and driver performance information are captured from the Vehicle Management performance monitoring tool daily. Fleet and group summary reports and Daily Incident Reports are generated and accessible via Web and email.

What are the benefits?

- Increase fuel efficiency, decrease fuel costs
- Improve fleet longevity, decrease wear
- Grow profitability, decrease insurance premiums
- Reward your best drivers, monitor your worst with driver-based reporting
- Model best behavior benchmarks
- Intelligently route around high-risk routes

System Requirements

- Vehicles operating in North America
- PeopleNet onboard computer
- PeopleNet Vehicle Management
- IE 4.0+, HTML email
