

Trailer Management

Two Way Command and Control.

Global transportation management solutions powered by StarTrak bring trailer management out of the yard and into the office. Operations can see the current location and status of all trailer assets, using a wide variety of predefined and user defined reports. Reefer temperature can be managed remotely while alerts allow for immediate action that can save a load. Hardware is robust and rugged, limiting maintenance costs while improving end-to-end operational efficiency.

- Increase trailer utilization
- Realize labor and fuel savings
- Enhance customer service
- Maximize resource efficiencies
- Improve overall cost of ownership

MANAGE TRAILERS—AND BUSINESS—BETTER.

Increase operational efficiency and visibility by remotely managing the locations and status of your trailers.

StarTrak helps you keep track of trailers wherever they are in the field and remotely control reefer units, without wasting valuable time and resources.

Remote trailer location information increases overall efficiency.

- Eliminates manual yard checks and locate lost trailers.
- Bill for excessive dwell time and incentivize locations to avoid wasting driver time.

Security measures and reporting help reduce fuel and cargo theft—and improve efficiency of fuel usage.

- Identify fuel theft at the pump.
- Receive alerts in real time when fuel levels decrease faster than can reasonably be used by the reefer.
- Identify potential theft of cargo while en route.
- Track trailers even when disconnected from the tractor.
- Quickly and efficiently confirm fuel usage compared to invoice.

READY TO EXPERIENCE A NEW LEVEL OF PERFORMANCE?

To find out how other fleets have blown past their performance limits visit www.peoplenetonline.com, call 888.346.3486, option 3 or email info@peoplenetonline.com.

Robust hardware provides comprehensive temperature, fuel, maintenance and logistical applications.

- Quick and easy installation in under an hour.
- Reliable, two-way interface to every type of reefer unit.
- Preventative maintenance features reduce long-term maintenance costs, expensive failures and higher "emergency" costs.

Remote temperature management of reefer units is efficient, accurate and convenient.

- Temperature acceptance records made available for distribution to customers.
- Identify exceptions and temperature risks.
- Efficient setting and turning on reefers.
- Remote changes to reefer settings allow for any necessary adjustments while the vehicle is in motion.
- Monitor and achieve maximum temperature compliance.
